

## Lab 14 (but not really)

April 26, 2022

For this optional lab, you are free to play around with Lab 7 to generate images or patterns of what ever you want. Below I have a some examples of images I generated using the lab code.

I would recommend using Random to help generate and translate polygons to create interesting patterns. To access the code I used to generate these images, you can access a repository on my GitHub, <https://github.com/andrew-guerra>.

Happy scripting!
